

GP Software 2019 Registration

Demo scenario

Based on the list of 133 criteria for the software tests in 2019, a demo scenario is presented below to illustrate how some of the criteria might be tested in a session of four hours. During the actual software test, another scenario might be used and/or other criteria (out of the list of 133) might be tested.

Action	Relates to criteria
Login	10.05.421
Open patient record with the patient's national number	10.03.003
Show synthesis overview of minimum required elements	10.03.008
Register a new contact on the date of yesterday	10.01.120
Register a reason for encounter as free text	
Register two new diagnoses (one diagnosis has an incomplete date of validity and status "inactive relevant")	10.00.021
Show use of ICPC2/ICD10 codes and coding system/version identification	10.02.060
Show that the coding tables are the default option when registering a diagnosis	10.02.025
Show if the software uses an own reference table	10.02.030
Register two health elements and show how the software handles the subcontacts	10.01.100 10.01.071 10.01.130
Show metadata of a registered health element	10.01.090
Register a non-medicinal treatment in the past	
Plan a renewal of one of the drugs used, over four weeks	10.05.204
Register a new contact on the date of today	10.01.120
Enter clinical data through a template and show existence in the patient record	10.00.011
Reactivate antecedent	10.00.043
Delete a clinical item	10.00.027
Integrate lab result and show that the software can identify the nature, the description and the conclusion	10.02.040
Display the protocol	
Show graphical overview of the lab results	10.03.006
Register new care trajectory for diabetes or renal insufficiency	10.05.011

Produce new prescription of a drug related to diabetes/renal insufficiency	
Show the allergy warning (if appropriate)	10.05.161
Show the correct mentioning (related to diabetes/renal insufficiency care trajectory) in the prescription	10.05.178
Produce a nursing/physiotherapy prescription	10.05.119
Export the nursing/physiotherapy prescription in a Kmehr enveloppe	10.05.118
Show calendar for primary prevention for this patient	10.03.011
Show vaccinations of the patient and register a new vaccination	10.05.301 10.05.306 10.05.311 10.05.316 10.05.321
Show “journal” of the patient record	10.03.009
Produce SUMEHR and demonstrate use of the flag Relevant/Not Relevant	10.03.045
Show that data can be edited and changed before sumehr is sent	10.03.035
Produce overview of list of contacts with the respective (clinical) data	10.03.005
Export the produced list (e.g. csv format or pdf)	10.00.016
Close patient record	
Show list of patients for primary prevention of breast cancer, cervical cancer and colorectal cancer	10.05.251 10.05.266
Register refusal for one of the patients of the list	
Register preventive act for another patient of the list	10.05.256
Demonstrate software update (remote/automated)	10.07.320/340
